VOLUME 21

PRODUCT CATALOG

Expect Excellence

At Ortho Technology (OT), our priority is to provide quality products and excellent service as we strive to be the best value-oriented Orthodontic Company in the industry. We understand that as a clinician, you are constantly searching to improve the treatment experience for your practice and your patients. This is why we consistently improve existing product lines and introduce product improvements like our NEW! Falcon Orthodontic Instruments – to help practitioners become more efficient.

Our purpose as an organization is to assist the clinician in improving their patient's health, smile, and self-esteem. We believe that Orthodontics is one of the most rewarding professions to be a part of. Our products help you improve patient health and vibrancy while providing lifetime results. Helping you create beautiful smiles is our business.

It is our mission to provide quality, value-oriented orthodontic products and services; to partner with you, our customers, as trusted advisors, enabling you to deliver the best patient care, while also helping you to enhance the efficiency and profitability of your practice.

Whether you're a practitioner in the United States or reside half-way across the globe, we want to thank you for your continued support. We understand that you have many options in the marketplace and want to thank you for making Ortho Technology "Your First Choice" for orthodontic supplies.

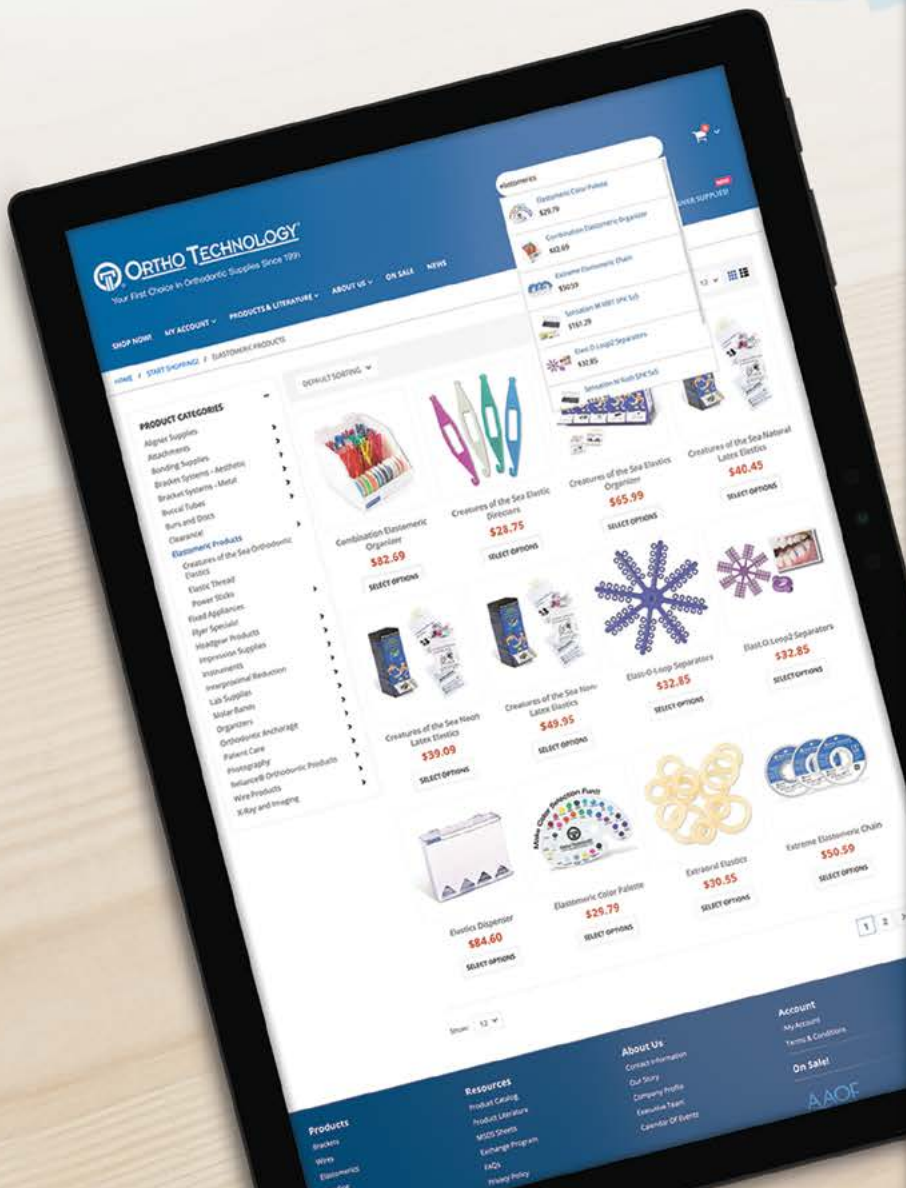

We look forward to our next 30 years as your business partner. Thank you for being part of our bright future – as we strive to provide you with even better value, happier patients, and a more efficient practice.

Our Systems

Ortho Technology Offers a Full Line of Archwire Solutions

TruFlex™, TruForce™, BetaForce™, Universal Form™, and TRIFECTA® lines are available in Stainless Steel, Beta Titanium, Nickel Titanium, Copper Nickel Titanium with and without stops and Thermal Nickel Titanium. Shaped as Pre-Torqued, Full Form, Euro Form, Standard Form, Reverse Curve of Spee and Retraction archwires. Available in Tooth Tone®, 8 Strand Braided, 3 Strand Twist, 6 Strand Coaxial, Spooled and Straight lengths. Available with etched or dimpled midlines. See pages 71-88

12 Different Bracket Systems Offer Maximum Choice

Crystal clear sapphire, translucent ceramic, metal-lined ceramic, composite, metal-lined composite, stainless steel, and self-ligating brackets. Patients will love the choices and you will love the performance of Ortho Technology's extensive line of bracket systems. See pages 8-51

Creatures of the Sea® Orthodontic Elastics

Easy to use identification system manufactured with high quality medical grade materials to deliver consistent and accurate force. Printed tooth diagram aids in proper placement of elastics. Packaged in light-resistant patient packs. See pages 104-105

TruFit™ 2.0 Molar Bands with Prewelded Buccal Tubes

Each TruFit 2.0 band has precision shaped tooth anatomy for a tight secure fit with excellent retention. Strong yet malleable proximal walls that require little to no burnishing. Maximum buccal height allows greater placement and positioning flexibility of buccal tubes and lingual attachments. See pages 58-65

Perfect

Your Practice

New and Improved!

Falcon Orthodontic Instruments®

Our new Falcon Orthodontic Instruments are designed and manufactured with smooth contoured edges, reliable flush screw joint, and polished corrosion-resistant finish. You can expect superior performance from stainless steel inserts and a lifetime warranty against material defects and craftsmanship. The care and precision that goes into each and every instrument will ensure a quality you can rely on with every use.

See pages 174-179

Bonding Supplies

From strong reliable adhesives and band cement, to MiniMold attachments, Nola Dry Field System, and bonding pads, we offer an extensive, complete line of products to aid clinicians through the entire bonding process.

See pages 108-123

Galaxy™ Diamond Discs Interproximal Reduction

Diamond Discs are perfect for both reduction and contouring. Smoothly remove tooth mass interproximally to create intra-arch space or open contact points between teeth. Great for use with many popular clear aligner systems.

Discs are available in 22.0 mm or 19.0 mm when space is limited.

See pages 145-146

DuraLock® PLUS Impression Trays

Using DuraLock PLUS trays save time. By eliminating the extra steps of coating the tray with adhesive and waiting for it to dry, the impression process is simplified and accelerated. DuraLock PLUS trays also

eliminate inadequate coverage and/or tissue impingement and ensure an accurate fit every time by offering more size choices than competing trays. Reliable strength and stability are the trademarks of DuraLock PLUS.

QUALITY AND EXCELLENCE

®

Over 30 Years
Since 1991

of Delivering Value to
Orthodontists Around the World

Over 30 Years of Excellence

Innovations in Aesthetics

Ortho Technology not only offers several aesthetic bracket lines but takes aesthetic treatment to the next level by offering an extensive selection of Tooth Tone® coated archwires.

Unique and Exclusive Products

Ortho Technology takes pride in offering a multitude of unique and exclusive products. We are constantly researching, developing, and improving our products to ensure the most innovative and highest quality products are available.

Product Line Variety and Completion

Ortho Technology offers all products necessary to complete any patient treatment. From first impressions to debonding pliers and burs as well as patient hygiene accessories, we offer a thorough selection of products.

Superior Customer Service

Ortho Technology strives to provide complete customer satisfaction with every interaction. By doing this, our goal is to ensure a long-lasting and trusted relationship with every customer.

Competitive, Transparent Pricing

The goal of Ortho Technology's pricing structure is to supply quality products at a fair price. We understand that a fair product price is just as important as the product itself. Retail pricing and specials can always be found on our website so customers know up front how our prices compare to competitors making budgeting easier.

Same Day Shipment

Most orders ship the same day you place your order. You can have your products as soon as the next business day. Place your order before 2:00 P.M. E.S.T. and request overnight shipping. Otherwise we will ship your order via standard carrier service.

Hassle-Free Returns

We understand that your purchase may not always meet your needs. In an effort to make the return process as hassle-free as possible, we ask that you please call us. Your satisfaction is very important to us, and your input helps us improve our products and service. When you call, a return authorization number will be assigned. This number will help expedite your exchange, credit, or refund.

INNOVATION, AESTHETICS AND EXCELLENCE

We understand that as an Orthodontist, you are constantly searching to improve the treatment experience for you and your patients. To support you, we offer innovative solutions through our many bracket lines. From stainless steel to clear sapphire, translucent ceramic and composite aesthetic to passive and active self-ligating, we have the bracket you need. Your patients will love the choices, and you will love the performance of Ortho Technology's extensive line of bracket systems. Expect the highest quality available at a fair price with every product we offer.

Sensation™

Active Ceramic Self-Ligating Bracket System

The Perfect Mix of Aesthetics and Efficiency

COMPARE TO:
Empower® Clear by American Orthodontics
In-Ovation® C by DENTSPLY GAC

The Benefits are Clear

Sensation Active Ceramic Self-Ligating Brackets benefit both patient and practice by providing uncompromised aesthetics and comfort for your patients with faster treatment times for your practice. Sensational results from start to finish. The ceramic material provides strength and durability as well as a translucent appearance that is unmatched by any other bracket system. The rhodium coating on the cobalt-nickel clip increases the clip's strength for extraordinary durability. A strong mechanical bond is created on the bracket base through the use of alumina spheres. Debonding is predictable and easy. The unique guide rail ensures stable and consistent force during clip opening and closing making archwire changes a breeze. With fewer archwire changes, shorter office visits, and reduced chairtime, the benefits are clear.

Sensation™ SLB Opening Instrument

Unique Clip Opening Tool Specifically Designed to Prevent Overstressing of the Clip

Sensation Brackets must be opened using the OT-7920 Clip Opening Instrument. **Using the incorrect instrument may result in clip damage.**

Item #: OT-7920
Heat sterilizable up to 370°F/188°C
1 per pack

Important Clip Opening/Closing Tips:

An important part of the closing procedure is making sure the archwire is securely pressed into the base of the archwire slot before pressing on the clip. This can be done with a ligature director or light finger pressure on the archwire. **Failure to do so may deform the clip and cause it to be inoperable.**

Both Sensation and Sensation M clips open and close in the same manner, however, each require a unique instrument. While both instruments may look similar, each must be used with the appropriate bracket system.

Sensation™ M

Active Stainless Steel Self-Ligating Bracket System

The Perfect Mix of Efficiency and Control

Brackets

COMPARE TO:
Empower® by American Orthodontics
In-Ovation® R by DENTSPLY GAC

Ideal Treatment Control

Sensation M Active Stainless Steel Self-Ligating Brackets allow for control of force levels during treatment. The passive stage of the clip during the initial treatment phase assists with leveling and aligning. Sliding mechanics are also enhanced during the passive and transitional phases. The active stage of the clip engages the archwire securely into the base of the archwire slot, fully expressing the in-out, angulation and torque built-in to the bracket.

Unlike traditional brackets where forces can diminish when ligatures are stretched into place, the self-ligating clip design offers continuous force levels during wire deflection/unloading. This allows practitioners to adjust time between office visits.

Removable Color Coded ID Dot
For easy bracket selection

NEW! Thicker Fixed Clip Design
For more durable performance - Sustains tension longer than previous version ensuring less clip deformation upon repeated opening/closing

Long Axis Scribe Line
Acts as a clear visual cue for placement at the top and bottom of the bonding base

Low Profile Design
Smooth rounded facial contours to optimize patient comfort

High Quality Clip
Manufactured using a Cobalt-Nickel alloy for resiliency and durability

Ample Under Tie-Wing Area
For application of elastomeric chains

Smooth Rounded Hooks
For added patient comfort and secure engagement of elastics

Compound Contour Base
Provides an ideal bracket fit to tooth surface

80 Gauge Micro-Etched Mesh Base
Ensures maximum bond strength with predictable and safe debonding

Identification System

Sensation™ M SLB Opening Instrument Unique Clip Opening Tool Specifically Designed to Prevent Overstressing of the Clip

Sensation M Brackets must be opened using the OT-8920 Clip Opening Instrument. **Using the incorrect instrument may result in clip damage.** Item #: OT-8920
Heat sterilizable up to 370°F/188°C
1 per pack

Important Clip Opening/Closing Tips:

An important part of the closing procedure is making sure the archwire is securely pressed into the base of the archwire slot before pressing on the clip. This can be done with a ligature director or light finger pressure on the archwire. **Failure to do so may deform the clip and cause it to be inoperable.**

Both Sensation and Sensation M clips open and close in the same manner, however, each require a unique instrument. While both instruments may look similar, each must be used with the appropriate bracket system.

Simple Opening - To open the Sensation M Bracket Clip:

1. Place the inside hook of the opening instrument into the opening of the door of the bracket interface.
2. Tilt the opening instrument gingivally to avoid possible removal of the clip.
3. Pull straight down to open using a gentle controlled force.

Simple Closing - To close the Sensation M Bracket Clip:

1. Place light pressure to seat the archwire in the slot base by using finger pressure or a ligature director.
2. Using light finger pressure, press up and in to close the clip.

PLUS®

Self-Ligating Bracket System

DUAL SYSTEM,
UNLIMITED OPTIONS

 PASSIVE

 INTERACTIVE

HYBRID System Available

COMPARE TO: In-Ovation® by GAC Dentsply
Damon® by Ormco Empower® by American Orthodontics

Brackets

An Advanced and Versatile SLB

Designed by an orthodontist, Lotus Plus DS is a self-ligating bracket system with major enhancements over its predecessors. It was created to address the many deficiencies of passive and interactive SLBs in the industry, while preserving a familiar twin-wing design so you can treat cases with more ease.

Featuring one-piece strength, high slot manufacturing tolerances, a unique planar clip design, and a low profile, Lotus Plus DS stands as one of the most advanced and versatile SLBs on the market.

Visible Results

"At the first visit the results were obvious, the basic leveling and aligning were well under way, without any patient discomfort."

Dr. Enis Güray
Orthodontist

Identification System

PURE[®] Sapphire Bracket System

The Ultimate in
Crystal Clear Aesthetics™

COMPARE TO:
Inspire ICE™ by Ormco

- 
- Smooth, Strong and Contoured Tie-Wings**
For added patient comfort
 - Archwire Slot Design**
Diamond and heat polished for superior sliding mechanics
 - Highest Quality Material**
Made from high quality monocrystalline sapphire
 - Unique Bonding Base**
Aluminum oxide spheres provide superior shear bond strength and predictable debonding
 - Ultra-Smooth, Strong Hooks**
For added patient comfort and secure engagement of elastics
 - Removable Color Coded ID Dot**
For easy bracket selection
 - Ample Tie-Wing Area**
For easy bracket ligation
 - Contour Base**
Provides simplified and accurate bracket placement

PURE® Patient Aesthetics

The macro photograph shows the clarity of the flawless PURE brackets. Made from pure monocrystalline sapphire for a bracket system with the highest transparency available for outstanding aesthetics. Nearly invisible against any tooth shade and stays crystal clear without staining.

PURE® Contoured Base

The anatomically contoured bracket base allows for quick and easy bracket placement. The customized tooth specific design fits the tooth curvatures perfectly to increase bond strength and simplify bonding appointments.

PURE® Patient Comfort

Each PURE bracket has been diamond and heat polished to produce rounded, smooth corners for uncompromised patient comfort. The small bracket size and low profile design also provide a desirable bracket both clinicians and patients will appreciate. The PURE brackets are also functional, the tie-wings are easy to ligate, exceptionally strong and highly fracture resistant.

PURE® Predictable Debonding

Remove all ligatures and wires. Remove flash from around the brackets with a high speed debonding bur.

Instruct the patient to bite down onto a cotton roll in the area brackets are being removed. Grasp the bracket with a straight or angled debonding plier at the bracket-adhesive interface. The bracket can be held along the occlusal-gingival or the mesial-distal edge. Gently squeeze the plier and gradually increase pressure until the bracket comes free from the tooth. Do not twist or pull the bracket.

The bracket is designed to release at the bracket-adhesive interface and will leave a layer of adhesive on the enamel for safety. This means that most of the adhesive will remain on the tooth after debonding.

Remove remaining adhesive with a high speed debonding bur or an adhesive removing plier. After bulk adhesive is removed follow up with a high or low speed enamel polishing bur.

PURE® Bond Strength

SEM photographs show the unique Double Fusing Method™ (DFM). The PURE bonding base is coated with aluminum oxide spheres, increasing the bonding surface area, which allows for secure retention during the length of treatment and provides for predictable debonding at the end of treatment.

Reflections™

Ceramic Bracket System

Proven Clinical Performance

The Reflections Ceramic Bracket System offers a unique combination of aesthetics, function, and strength. The dovetail base design has generous undercuts which grab any adhesive firmly and ensure maximum mechanical bond strength, yet debond easily. Reflections Brackets are made from 99.9% pure polycrystalline alumina ensuring the translucency patients want.

Reflections Brackets are designed to decrease the occurrence of bracket fracture, increase the torque control, increase the sliding mechanics, and provide the clinical functionality doctors need. Reflections Brackets are the clear alternative for aesthetic treatment.

Stainless Steel Bracket System

The Bracket Built for Practice Productivity

Brackets

COMPARE TO:
OmniArch® Plus by Dentsply Sirona

Two-Piece Bracket System

The Votion Bracket System utilizes Metal Injection Molding (MIM) technology to achieve extremely complex bracket structures and contours that enhance treatment efficiency, compared to traditional cast or machine manufacturing.

Intelligent Hook Design
Hooks are angled at 15° to reduce interference with gingival tissue

Smooth Facial Contours
For increased patient comfort

Vertical Scribe Line
For easy and more accurate placement on the long axis

Compound Contour Base
Superior fit and greater contact surface area for improved retention

Permanent Identification System
With a removable color coded dot and permanently recessed I.D. mark

Ample Under Tie-Wing Area
Allows for easy and secure ligation

Rounded Archwire Slot Contours
Mesial and distal slot entry points are rounded to help prevent archwire notching when rotations are present and during retraction/protraction procedures

Identification System

© 2021 Ortho Technology, Inc. Votion is a registered trademark of Ortho Technology. OmniArch is a registered trademark of Dentsply Sirona.

VOTION®

Stainless Steel Bracket System

Low Profile Design

Improved aesthetics and patient comfort

Anti-Rotation

Ortho Technology's version of the Roth Prescription features built-in anti-rotation in the cuspid and bicuspid bracket archwire slots to help prevent unwanted rotation during sliding mechanics

Intelligent Hook Design

Hooks are designed with a 15° angle to reduce interference with gingival tissue. The ball hook is further rounded to minimize soft tissue irritation and improve the patient experience

Ample Under Tie-Wing Area

Allows for easy and secure ligation, and improves chairside efficiencies with fast ligature application and removal

80 Gauge Micro-Etched Mesh Bonding Base

Each base is micro-etched to ensure optimal adhesive properties and helps reduce bond failures for increased office productivity

Votion®

PINNACLE® STAINLESS STEEL BRACKET SYSTEM

Revolutionary Strength and Consistency in a One-Piece Bracket

MADE IN THE USA

COMPARE TO:
Mini Master™ by American Orthodontics

Intelligent Hook Design
Smooth rounded hooks reduce soft tissue irritation

Cross Scribe Lines
Unique vertical and horizontal scribe lines in the center of the bracket head for superior visual cues. The patented, raised horizontal line on the bracket base further enhances visibility for optimal bonding placement accuracy

Micro-Etched Pylon Base Design
Created from the original Marquis™ base, Pinnacle's redesigned version features angled pylons that offer increased surface area for superior retention and bond strength

Permanent Identification System
With a removable color coded dot and permanently recessed I.D. mark

Rounded Archwire Slot Contours
Mesial and distal slot entry points are rounded to prevent archwire notching when rotations are present and during retraction/protraction procedures

Optimized Compound Contour Base
Brackets are individually contoured for an ideal fit to each tooth for correct positioning

Identification System

© 2021 Ortho Technology, Inc. Pinnacle is a registered trademark of Ortho Technology. Mini Master is trademark of American Orthodontics.

Brackets

PINNACLE® STAINLESS STEEL BRACKET SYSTEM

One of the Most Modern Brackets in the Industry

Pinnacle combines classic design with modern elements for better treatment efficiency. Through advanced Metal Injection Molding (MIM) technology, more intricate contours and structures are achieved for reduced friction, optimum patient comfort, and enhanced visual placement marks. A specialized process leaves Pinnacle with a brilliant high-shine surface.

Helps Reduce the Need for Canine Bracket Re-positioning

Doctors struggling with rotations from retraction procedures are able to place Pinnacle more accurately at the beginning of treatment with anti-rotation in the slot.†

Pinnacle®

Maxillary Anti-Rotation

Centrals & Laterals = 0°
Cuspids = +4°M
Bicuspids = +2°D

Mandibular Anti-Rotation

Lower Anterior = 0°
Cuspids = +2°M
Bicuspids = +4°D

Low Profile Smooth Facial Contours

For increased patient comfort

Ample Under Tie-Wing Area

Allows for easy and secure ligation

Anti-Rotation in the Slot

†Ortho Technology's version of the Roth prescription features anti-rotation in the archwire slot to prevent unwanted rotation during sliding mechanics

Marquis™ Stainless Steel Bracket System Fully Preprogrammed Bracket System™

MADE IN THE
USA

COMPARE TO:
Mini Master™ by American Orthodontics

Brackets

One-Piece Bracket System

Identification System
By quadrant with a removable color coded dot and permanently by a recessed I.D. mark

Chamfered Archwire Slot
For easy archwire engagement
Archwire slot is parallel to incisal edge of tooth

Highest Quality Material
Cast from the high quality 17-4 stainless steel for unsurpassed strength

Rhomboid Shape
With defined center scribe line for easy and accurate bracket placement

Superior Shear Bond Strength
Makes for less bond failure

Ball Hooks
No additional charge

Contoured Tie-Wing
For added patient comfort
Tie-wings are parallel to tooth anatomy

Generous Tie-Wing Area
For easy bracket ligation

Ultra Low Profile
For added patient comfort

Torque In Base
Compound-contoured design
Base of bracket is parallel to the incisal edge of tooth

Extended Base Design

- Electrical Discharge Machining (EDM)
- Retention superior to mesh bonding pads
- The extended base of the bicuspid provides a better fit and added retention
- The micro-etched pylons are designed at an acute angle generating miniature anchorage points that embed firmly into the adhesive for maximum bond strength

Identification System

Presentation Typodonts

MADE IN THE USA

Brackets bonded 7 to 7 with archwires, buccal tubes on upper and lower first and second molars, and clear ligatures in place. Solid tissue colored gingiva base or clear flexibase with tooth tone colored teeth molded separately and inserted in place prior to bonding. The high quality detail makes these hinged typodonts the perfect presentation aid. All typodonts arrive in a hard plastic case with foam insert perfect for safe, protective storage.

Precision Preweld Position Buccal Attachments to Molar Bands

Upper Molar

Lower Molar

TruFit 2.0 Molar Band Features

- **Shaped for a Precise, Tight Fit on Every Tooth**
Each band has precision shaped tooth anatomy for a tight secure fit with excellent retention.
- **Medium Temper Malleable Stainless Steel Finished to a Brilliant Mirror Luster**
TruFit 2.0 stainless steel bands are strong enough to avoid wall collapses while being malleable enough for snap fittings that require little to no burnishing.
- **Laser Etched Exterior Identification System with Micro-Etched Interior**
TruFit 2.0 bands display an exterior laser etched identification system for easy product selection. The interior is micro-etched to increase bond strength and retention.
- **Band Sizes Available From 29.5 to 44**
See pages 64-65 for our band conversion chart.

Lotus^{PLUS} DS Self-Ligating Bondable Buccal Tubes

An Advanced Buccal Tube

The innovative Lotus Plus DS Self-Ligating Buccal Tubes offer passive or interactive ligation and feature unique maxillary and mandibular designs with anatomical mesh pads for maximum bond strength and fit.

Low Profile Hook
For patient comfort

Positioning Notch
To assist with placement and avoid interference

Low Profile Design
To reduce occlusal interference and provide maximum patient comfort

Mesh Pad with Defined Buccal Indent
For a precise contoured fit

PASSIVE
Upper Right

INTERACTIVE
Lower Right

- Self-Ligating Nickel Titanium Clip for easy wire placement
 - No need to re-tie previously converted tubes
 - Flexible clips help eliminate step bends
 - Contoured, mesially extended base for an accurate, precise fit
 - Positioning notches for quick alignment
- 1 pack (10 tubes)

A COMPLETE SL SYSTEM WITH OUR
Lotus Plus DS Self-Ligating Brackets

- **Stainless Steel Construction**
- **Molded Compound Contour Base with 80 Gauge Indented Mesh Pad** provides an anatomically correct fit that conforms to the tooth ensuring maximum bond strength
- **The Indented Pad** assists in easy and accurate placement to conform into the buccal groove
- **The Extended Base** provides maximum coverage for greater bond strength and control
- **4.2 mm Mesial/Distal Dimension** for full rotational control

TruEase Buccal Tubes Mini Typodont

Item #: G50-000

Includes: 1x TruEase Buccal Tube and 1x TruEase Low Profile Mini Buccal Tube

Votion® Bondable Buccal Tubes

Integrated Appliance System Designed to Work Seamlessly with Votion Brackets

The Votion Buccal Tube is a single non-convertible tube designed with practitioners' and patients' needs in mind. Placement and positioning are made easy with side positioning indents, a defined buccal indent, and a compound contour base. Patients benefit from a smooth, low-profile rounded shape, and lowered hook helping to reduce patient discomfort during treatment.

Bonding Base

- **80-Gauge Micro-Etched Mesh Pad** ensures maximum bond strength
- **Metal Injection Molding (MIM) Stainless Steel**
- **Low Profile** for maximum patient comfort
- **Occlusal/Gingival Positioning Indents** for easy placement and minor adjustments
- **Smooth Rounded Surfaces and Lowered Hook** position and orientation for improved patient comfort
- **Defined Buccal Indent and Compound Contoured Base** for ease of placement and anatomical fit that conforms to the tooth

TruCast™ Low Profile Bondable Buccal Tubes

Maximum Bond Strength with a Comfortable Anatomical Fit

- Color coded scribe line for height and angulation reference point, Red = Upper, Yellow = Lower
- Indented 80 gauge mesh pad for an anatomical fit and maximum bond strength
- Occlusal and gingival positioning notches for ease of placement and handling

1 pack (10 tubes)

Lower Profile Design
To reduce occlusal interference

Positioning Notch
To assist with placement and avoid interference

Removable Color Coded Identification
Marked for quick and accurate placement. Red upper and yellow lower

Low Profile Hook
For patient comfort

Indented Mesh Pad
For a precise contoured fit

Mesial/ Distal Dimension
3.6 mm

Chamfered Entry
Guides wires into buccal tube

Full Form Archwire

The broad, natural archform is the preferred shape for most clinical applications. It is ideal for use with bracket systems that have a built-in prescription, and can be used from start to finish with little to no wire bending.

Available in:

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
|  TruFlex™
Nickel Titanium Archwire |  TruFlex™
Thermal Nickel Titanium Archwire |
|  TruFlex™

|  Tooth Tone®
Coated Nickel Titanium Archwire |  Tooth Tone®
Coated Stainless Steel Archwire |
|  TruForce™
Stainless Steel Archwire |  BetaForce™
Beta Titanium Archwire |

Euro Form Archwire

The euro arch form has a slightly narrower anterior region when compared to the full form shape, and remains narrow in the posterior region for clinicians who prefer a more oval form.

Available in:

- | | |
|---------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
|  TruFlex™
Nickel Titanium Archwire |  TruFlex™
Thermal Nickel Titanium Archwire |
|  TruForce™
Stainless Steel Archwire |  BetaForce™
Beta Titanium Archwire |

Standard Form Archwire

The standard form, also known as a classic arch form, strictly reflects general arch symmetry. Often it is re-shaped and contoured and has enough length for wire bends, loops, and adjustments.

Available in:

- | |
|---------------------------------------------------------------------------------------------------------------------------------|
|  TruForce™
Stainless Steel Archwire |
|---------------------------------------------------------------------------------------------------------------------------------|

Pre-Torqued Full Form

TruFlex Nickel Titanium Pre-Torqued Archwire provides low force, precise 20° anterior torque while enabling earlier introduction of torque in the upper centrals and laterals. Three anterior segment widths are available with etched center marks for accurate placement. Doctors and patients will appreciate the shorter chairtime provided by eliminating archwire bends.

Available in:

- | |
|--------------------------------------------------------------------------------------------------------------------------------|
|  TruFlex™
Nickel Titanium Archwire |
|--------------------------------------------------------------------------------------------------------------------------------|

Universal Form™

The wide universal arch can be used on the upper or lower and creates the broad smile that displays the first and second bicuspids when viewed from the anterior – perfect for use with self-ligating bracket systems.

Reverse Curve of Spee & Straight Leg Reverse Curve of Spee

The same great features as regular TruFlex NiTi archwires combining the advantages of super elastic, continuous forces and the benefits of a reverse curve. The Straight Leg RCS TruFlex NiTi is designed with additional length. Both are excellent wires for bite opening and closing due to deep or open bites, lower arch expansion, intrusion of the lower anterior teeth, and also provide excellent leveling and alignment.

Available in:

- | |
|------------------------------------------------------------------------------------------------------------------------------|
|  TruFlex™ Nickel Titanium Archwire |
|------------------------------------------------------------------------------------------------------------------------------|

Retraction Archwire

TruForce Stainless Steel Retraction Archwires are available in an assortment of looped or brass post archwires for anterior intrusion or retraction, space closure, or elastic engagement.

Available in:

- | |
|-------------------------------------------------------------------------------------------------------------------------------|
|  TruForce™ Stainless Steel Archwire |
| • Stainless Steel Retraction Archwires |

Specialty Archwires

TruForce Stainless Steel is also available straight wire lengths, or three different multi-strand archwires: 3-strand twist, 6-strand coaxial, and 8-strand braided archwire. Each multi-strand wire features light force levels, good flexibility, and can be cut and formed without unraveling.

Available in:

- | |

| • 8-Strand Stainless Steel Braided Archwire |
| • Stainless Steel Straight Lengths |
|  BetaForce™ Beta Titanium Archwire |
| • Beta Titanium Straight Lengths |

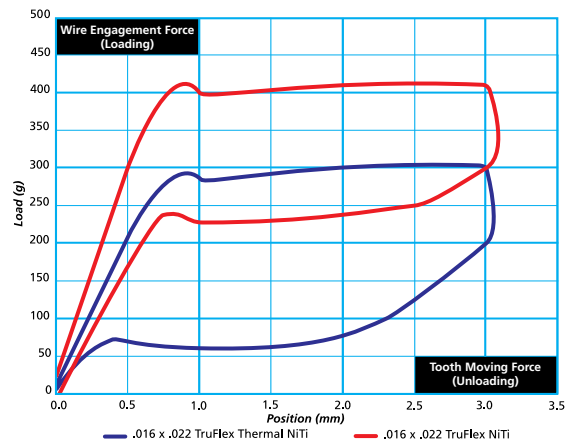

TruFlex™

Nickel Titanium

Patients will appreciate the comfortable force levels provided during the initial treatment phase. Doctors will love the accurate and consistent results in treatment. TruFlex Nickel Titanium products – guaranteed quality at competitive prices.

- Predictable, light continuous force levels
- Bright finish for optimal sliding mechanics
- Resistant to deformation for high spring back
- Consistent accurate arch shapes
- Satisfaction guaranteed

Wires

TRUFLEX™ NICKEL TITANIUM

TruFlex™ Nickel Titanium Full Form Archwires

MADE IN THE USA

The broad, natural archform is the preferred shape for most clinical applications. TruFlex NiTi uses super elastic properties and is provided in the austenitic or activated state. TruFlex NiTi offers mid-range force characteristics, consistent force levels, a smooth bright finish, and excellent rebound and memory properties.

Wires

TRUFLEX™ NICKEL TITANIUM

TruFlex™

Thermal Nickel Titanium

TruFlex™ Thermal Nickel Titanium Full Form Archwires

The broad, natural arch form is the preferred shape for most clinical applications. TruFlex Thermal NiTi is provided in the martensitic or soft and pliable state and becomes super elastic once it reaches the transformation temperature of 90°F/32°C and becomes activated or austenitic. TruFlex Thermal NiTi provides gentle, lower force levels and a smooth, bright finish. The extreme pliability of TruFlex Thermal NiTi wires offers easy ligation and therefore larger size wires can be introduced at earlier phases in treatment without compromising patient comfort.

TruFlex™ Thermal Nickel Titanium Euro Form Archwires

The euro arch form has a slightly more narrow anterior region when compared to our full form shape. Provides gentle low forces for maximum patient comfort, allowing for the introduction of larger wire sizes earlier in treatment without compromising patient comfort. TruFlex Thermal NiTi is extremely soft and pliable at room temperature for easy ligation. Once ligated, its shape memory becomes active with the patient's natural body temperature (90°F/32°C). Highly smooth, with a bright finish for reduced friction.

Universal Form™ Archwires

MADE IN THE USA

The wide universal arch can be used on the upper or lower and creates the broad smile that displays the first and second bicuspids when viewed from the anterior. Perfect for use with self-ligating bracket systems. The Universal Form archwire provides all the features of our TruForce, TruFlex, and BetaForce wires with the added benefit of our carefully designed arch form.

- Perfect archwire sequencing for self-ligating bracket systems
- Excellent resiliency
- Precise and consistent force levels
- Etched midline

TruFlex™

COPPER
Nickel Titanium

The Latest Advancement in Nickel Titanium Archwire Technology

The inclusion of copper to the nickel titanium alloy accentuates the thermal properties and working characteristics of the wire.

The lower hysteresis of TruFlex Copper provides a lighter tactile "feel" of the wire at room temperature which translates to additional flexibility providing for easier placement on cases with crowding conditions.

The unique alloy composition not only gives you easier insertion into the brackets, but also provides a greater resistance to deformation. TruFlex Copper provides controlled loading and unloading forces for a greater working time range, resulting in fewer archwire changes needed.

These controlled force levels translate to gentle, continuous forces providing consistent and predictable tooth movement throughout treatment.

Universal Form Available with Stops and without

Available in 27°C or 35°C Force Levels

- **Use 27°C Copper**
When Higher Force Levels are Needed
- **Use 35°C Copper**
When Medium Force Levels are Needed

3-Point Bend Test performed on a 10.0 mm wire span in the Buccal-Lingual plane to allow for curvature of the archwire. Tooth-moving forces at 1.5 mm deflection.

BetaForce™

Beta Titanium

Force Levels Between Nickel Titanium and Stainless Steel / Nickel-Free

The BetaForce Beta Titanium archwires are nickel-free with properties that fall between the bendability of Stainless Steel and the flexibility of Nickel Titanium. BetaForce wires have a smooth, polished surface for excellent sliding mechanics and provide moderate wire stiffness levels at 60% less than Stainless Steel. Beta Titanium wires offer excellent formability, making it ideal for intermediate and finishing stages of treatment.

TruFlex™ Nickel Titanium Pre-Torqued Full Form Archwires

Ideal for Use with Passive Self-Ligating Bracket Systems

TruFlex Nickel Titanium Pre-Torqued Archwire provides low force, precise 20° anterior torque while enabling earlier introduction of torque in the upper centrals and laterals. Three anterior segment widths are available with etched centermarks for accurate placement. Doctors and patients will appreciate the shorter chairtime provided by eliminating archwire bends.

We Give Back

Ortho Technology is a proud Founder Level Partner of the American Association of Orthodontists Foundation.

Ortho Technology is committed to making a positive difference in the future of the orthodontic community.

Ortho Technology has always been deeply committed to the orthodontic industry and is pleased to be able to give back to the profession by partnering with the AAOF.

Reduce Emergency Visits! No More Poking Archwires!

Crimpable Mini Stops

- Extremely low profile and small in size, making them more aesthetically pleasing than typical crimpable stops
- Very comfortable for the patient due to the small size
- Slides easily onto the archwire for customized placement
- Crimps easily into place with Weingart Style Utility Pliers
- 2.0 mm in length
- Stainless steel
- Made in the USA

Anchor Wire Bite Corrector

Enclosed Nickel Titanium Springs

Titanium Clamps & Screws

Better Results with More Efficiency

Help your non-compliant patients make the transition to an ideal Class I molar relationship quickly and comfortably using the TruEase Bite Corrector Device.

- Bands/Headgear Tubes Not Required**
 The Double Lock Bite Corrector attaches directly onto the archwire, without removal, and locks into place; no headgear tube or band required.
- Quick and Easy Installation**
 Placement can be done chairside in minutes with "out-of-the-box" installation. No waiting for your lab to fabricate an appliance.
- Universal Orientation**
 Appliances are bi-directional, eliminating extra part numbers and placement mix-up.
- No Adjustment or Reactivation Needed**
 The enclosed Nickel Titanium springs exert continuous low forces until removal for predictable results.
- More Comfortable than Open-Spring Correctors**
 The fully enclosed spring won't create food traps, unlike open-spring correctors, and has no exposed mechanisms to impinge soft tissue.
- Versatile**
 Applicable for both extraction and non-extraction cases, with two styles to choose from: Double Lock and Anchor Wire.
- Perfect for Non-Compliant Patients**
 Get maximum results with minimal patient cooperation.

TruEase™

Bite Corrector Devices

Case Studies

Superior Results in Less Time

Class II / III correction with standard techniques can take anywhere from 6 to 12 months, often requiring frequent attention. The TruEase Bite Corrector can provide the same treatment results in half the time without the need for patient compliance or spring reactivation. Simply install in one appointment and let it work for you.

No Bands & Headgear Tubes Needed

"The TruEase Double Lock version attaches directly onto orthodontic archwires without the necessity of laboratory work, and allows lateral mandibular movements."

- Dr. Pablo Echarri, Orthodontist

Measurement Instructions

TruEase Bite Corrector Anchor Wire Device

(Figure 1A)

- Class II**
1. Have the patient bite down
 2. Measure from the distal edge of the lower cuspid bracket to the distal end of the upper molar facebow tube (Figure 1A).

(Figure 1B)

- Class III**
1. Have the patient bite down
 2. Measure from the distal edge of the upper cuspid bracket to the distal end of the lower 1st molar lip bumper tube (Figure 1B).

See the chart below for measurement ranges (A) and part numbers.

 Anchor Wire/Double Lock Combination..... G31-025

The Spider Screw® System

The Spider Screw's geometry is a result of careful design in every single detail. In fact, the Spider Screw has obtained two international patents since its inception, due to its innovative characteristics: the simultaneous presence of the external and internal rectangular slots and round internal slots.

The Spider Screw's design is extremely versatile, due to its small dimensions and unique design. It is easily placed in either the maxilla or mandible, even where access is limited and bone quality is less than ideal. Placement is simplified by the self-drilling feature found in the K1 Plus, K2 Plus, K1 and K2 Spider Screw systems. Spider Pin requires pre-drilling.

The Spider Screw has been developed to offer a number of versatile anchorage options capable of immediate loading. Immediate loading is possible because the Spider Screw is a non-osteointegrable implant and consequently force can be applied immediately after placement. The applied force can range from 50 to 300 grams depending on screw choice, bone quality, and the desired orthodontic movement.

The Spider Screw is an anchorage device that can be used during every phase of orthodontic treatment and is suitable for symmetric or asymmetric anchorage. The Spider Screw assists in the success of orthodontic treatment, both in adults and adolescents, by reducing treatment times without patient compliance.

The Spider Screw package includes three removable labels containing important information (device name, reference code, lot number, etc.) which is to be applied to the patient's record card for traceability. Our sterile packaging ensures the Spider Screws are ready to use whenever you need them, saving your office valuable processing time. The screws have been cleaned, decontaminated and sterilized via gamma radiation, simply use sterile handling protocol.

Anchorage

Orthodontic Head

- Designed to facilitate appliance (wires, springs, etc.) placement
- Features two intersecting .022" slots
- Under tie-wing area also functions as another .022" x .025" slot featuring two intersecting slots of .027" in diameter
- Chamfered inlets simplify insertion of wires or ligatures
- Small head dimension is designed for patient comfort

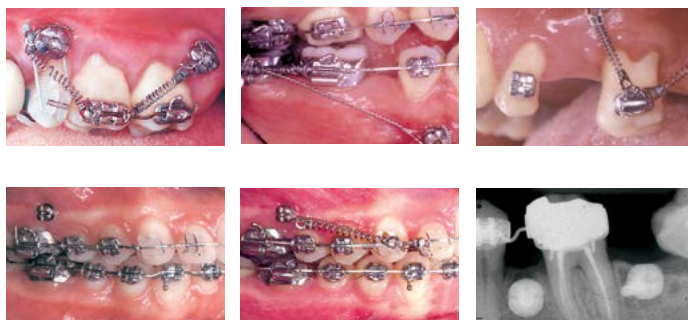

Transmucosal Portion

- Variable length allows for optimal adaptation to different intraoral mucosa thicknesses during bio-maintenance
- Short length for areas of thinly attached gingiva
- Long for areas with thick or freely movable tissues
- Polished with a special treatment to help avoid soft tissue irritation and make cleaning easier to accomplish

Intrabony Portion

- Thread shape has an asymmetrical profile for easy placement
- Ensures maximum stability and avoidance of bone stress
- Self-drilling and self-tapping makes pre-drilling before insertion unnecessary dependent upon bone structure
- Easy to place while reducing the risk of root damage

Clinical Cases

- Intrusion Posterior Areas
- Direct Anchorage Uprighting and Molar Intrusion
- Class II Correction
- Lower Molar Protraction Indirect Anchorage
- Molar Uprighting and Intrusion

- Nickel-free for sensitive patients
- One per pack

Self-Ligating K1 Plus Series

Conical: Self-Drilling Thread

The Spider Screw Self-Ligating TAD - K1 is self-drilling and self-tapping. Due to the design of the conical thread, drilling is eliminated in most areas of the mouth. In areas of high bone density, it may be necessary to utilize the 1.1 mm drill provided to penetrate the cortical plate. The locking head is color coded pink for easy identification.

Spider Pin™

Cylindrical: Pre-Drilling Thread

The Spider Pin is self-tapping and requires pre-drilling. It is ideal for areas where a reduced size head is required and the infrabony portion is narrow. The simple design increases patient comfort and makes it easy to attach coil springs or elastic chains.

Spider Screw Self-Ligating TAD Starter Kit

- 1x 1.1 mm x 8.0 mm drill - K1
- 1x 1.3 mm x 9.0 mm drill - K2
- 1x Pick-up driver shaft - SXL
- 1x Contra angle pick-up driver short - SXL
- 1x Self-ligating TAD key
- 1x Handle driver - SXL
- 1x Screw driver body
- 1x Organizer

Entire Kit Can Be Sterilized

- Autoclavable up to 273°F/134°C
- Heat Sterilizable up to 356°F/180°C
- Chemically up to 297°F/132°C

Spider Pin™

Temporary Anchorage Device System

For Areas Where a Reduced Head Size is Required

- Simple and easy to use
- Smooth, rounded design for patient comfort
- Perfect for NiTi closed coil spring attachments
- Infrabony portion diameter is 1.3 mm at the widest point
- Ideal for narrow interproximal spaces
- Requires no patient cooperation and reduces treatment time
- Self-tapping and requires pre-drilling

Spider Pin Starter Kit

1.3 mm Diameter

- 1x 0.9 mm x 10.0 mm drill
- 1x Contra angle pick-up driver - pin
- 1x Short handle driver - pin

Assure® Plus

All Surface Light Cure Bonding Primer and Enhancer

The Most Versatile Resin Ever Developed

- Enhances bond strength on all surfaces
- Tolerates moisture contamination
- Primes and conditions any tooth surface for bonding
- Effective on any enamel type
- Effective on any artificial substrate
- Eliminates hydrofluoric acid with porcelain crowns

Assure Plus
All Surface Bonding Resin
Item #: PLUS
1x 6 mL bottle

Clinical Applications

- Normal or atypical enamel
- Dentin or cementum
- Eliminates additional conditioners with:
 - Stainless
 - Amalgam
 - Gold
 - Composite
 - Acrylic
 - Pontics
- Eliminates hydrofluoric acid application with:
 - Porcelain
 - Lithium Disilicate
 - Zirconia

Assure Plus Unidose
Item #: UAP50
50x 2 mL

PRO SEAL® & L.E.D. PRO SEAL®

Light Cure Highly Filled Sealant

Enamel Protection From Start to Finish

- Two year surface protection
- University tested in over 15 studies and clinically proven
- Sets without oxygen inhibited layer - smooth, hard finish
- Fluoresces under UV light
- Patented catalyst system

Clinical Applications

- Routine enamel protection
- Hygiene challenged patients
- Mitigates decalcification
- Can be applied under bracket as a primer or around bracket

GoTo®

Light Cure Bracket Adhesive

GoTo® is a light cure adhesive with superior handling properties. It does not allow bracket flotation once placed on the tooth or during flash removal. A fraction of the retail cost of leading, competitive light cure pastes!

Newly Developed - Superior Working Properties

- Proven bond strength and consistency
- Unique viscosity easily penetrates bracket pads
- No bracket drift - stays in place until cured
- New proprietary microfiller construction
- One piece flash removal - "ropes" off bracket periphery
- Translucent finish matches any tooth shade
- Maximum bond strength
- Easy removal and cleanup
- UV disclosing agent - fluoresces on tooth

Clinical Applications

- Bracket and tube bonding
- Fixed lingual retainer bonding
- Bonds all metal, ceramic and composite attachments

Translucent

Flow Tain™

Light Cure Flowable Microfil Composite

Flow Tain™ Low Viscosity is a flowable light cure composite. The composite is highly polishable which will reduce wear and enhance patient comfort. When cured, Flow Tain Low Viscosity has low modulus of elasticity and is not as brittle as conventional composites.

Even though Flow Tain is a flowable material, the thixotropic properties prevent slumping for better control.

Using the tips provided, Flow Tain is easily injected onto lingual surfaces and across fiber splints.

Rely-a-Bond®

No Mix Bracket Adhesive

1 Step/Contact Adhesive

- Contact cure - primer to paste
- Chemical cure - no light required
- Saves time and material:
 - No mixing
- Minimizes adhesive per bond
- Highly filled paste:
 - Increased bond strength
 - Tacky viscosity
 - Prevents bracket drift

- Choice of packaging:
- Push syringe
 - Syringe tips
 - Contains fluoride

Ultra Band-Lok[®]

Light Cure Compomer Band Cement

Industry Leader in Band Cement

- Single Paste System
- Light Activated
- Resin Base - Glass Ionomer
- High Fluoride Release
- Natural or Blue Shade

Bonds To Metal

Ultra Band-Lok[®] will bond chemically to stainless steel bands. Removal is all in one piece with cement in the appliance, making cleanup effortless.

All Purpose Band Cement

Ultra Band-Lok[®] can also be used to bond large acrylic appliances and as an occlusal build-up material.

Clinical Applications

- Band cementation
- Occlusal build ups
- Acrylic appliances - Hyrax, MARA, RPE, etc.
- Lab block out material
- Non-fluoride upon request

Simplified Cleanup

Occlusal Buildup

Bond Aligner®

Light Cure Aligner Adhesive

Bonds Attachments to Clear Aligners

- Secure aesthetic bonds
- Bond to any clear aligner material
- No primers or conditioners
- Clear light cure paste
- High modulus of elasticity:
 - Conforms to aligner distortions
 - Secure bonds throughout
- Bond ceramic, metal or plastic attachments

MAKE IT AESTHETIC!

Mini-Mold™ Button Tips
 See page 117

- An aesthetic solution to metal buttons

C&C™ Composite and Chain System

Molded Base and Chain Extrusion System

Unparalleled Strength

The C&C™ System does not use protruding metal attachments. Our patent pending design molds a base with composite - adapting flush to any palatal or buccal exposure.

Painless Removal

Instead of painfully breaking a bracket off a mobile tooth - the C&C™ is ground down with a bur - resulting in less patient discomfort.

Disposable Attachment Mold with Chain

- Large DCCP
 Small DCCO

Cybird^{XD}

ADVANCED LED CURING LIGHT

Reduce Chair Time!

Reduce Bonding Time

The Cybird XD advanced curing light is designed particularly for the orthodontic professional in need of super-fast light curing and bonding speed to reduce chair time. It features two powerful curing modes to choose from for practice preference.

Wide Application Range

The Cybird XD LED produces a variable wavelength range of 430-490 nm, assuring full curability of a wide range of adhesives.

Functional Aesthetics

The ergonomically shaped curing light is well-balanced for ideal handling. Cybird XD's square body prevents roll-off at chairside tables and is shaped for a more natural grasp.

Clever Construction

Built from industrial grade lightweight aluminum. The turbo 8 mm fiber-optic light guide and sleek body design grants superb oral access for effortless usability.

Intuitive Keypad

Practitioners save time with simplicity: a shot button and a mode selector / timer button for various applications.

1 Year Limited Warranty

(Green Indicator Light)
The Traditional High Power Mode (1,500 mW/cm²) allows you to polymerize light-cured adhesives at 5, 10, 15, or 20 second intervals.

(Orange Indicator Light)
Easily switch to the Plasma Emulation Mode (2,700 mW/cm²) for quicker cure times of 1.5, 2, 2.5, or 3 second intervals and achieve chair time efficiencies and reduced orthodontic bonding times.

When using the plasma emulation mode, it is recommended to use the light shields to direct light only to the appliance and enamel, and prevent any unnecessary light dispersion to the gingiva.

Mini-Mold™ TECHNIQUE

Light Cure Your Own Aesthetic Attachments
IN SECONDS!

Inventor
Dr. Roger Wolk
D.D.S., M.S.

Dr. Roger Wolk is the inventor and developer of the Mini-Mold™ Technique. He has been a prominent Orthodontist in the Los Angeles area for over 30 years.

Dr. Wolk is a retired Diplomate of the American Board of Orthodontics and Member of the American Dental Association.

3-STEP TECHNIQUE

STEP 1 **FILL** the selected Mini-Mold Tip with light-cure resin

STEP 2 **PLACE** the Mini-Mold Tip on desired tooth

STEP 3 **LIGHT-CURE** the Mini-Mold Tip for 5-20 seconds

With the Cybird XD Advanced LED Curing Light from Ortho Technology on page 116

Mini-Mold™ Starter Kit

MADE IN THE USA

- Safe for sensitive patients
- Saves chair time and money
- Invisible aesthetic attachments
- Fast 5-20 seconds cure time

Item #: 51399
Kit includes: 30x Mini-Mold Tips 3 of each style, 2x tip handles, and detailed step-by-step instructions

8 Different Mini-Mold™ Treatment Tips to Choose From

Package includes: 8x or 10x Mini-Mold Tips (same type), 1x tip handle, and detailed step-by-step instructions. Cold sterilizable and tips are autoclavable up to 275°F/135°C.

Mini-Mold™ Posterior Molar Pad Tips

Designed to open the bite from the posterior teeth.
Item #: 51390
10 per pack

Mini-Mold™ Wire Bonder Tips

Ideal for making direct bond lingual retainers.

BONDING SUPPLIES

Fully Exposes Both Arches to Provide Maximum Access

- Direct and indirect bonding procedures
- Full field access
- Interproximal stripping
- Bite registration
- Photography
- Debonding
- Microetching

Advantages:

- Unique intraoral extensions retract buccinator muscles
- Provides unobstructed view and superior buccal access
- Maintains accessibility during all types of procedures
- Safe for autoclave and dry heat sterilization up to 350°F/177°C

High Heat Cheek Retractor

The easy to use, one size fits all Cheek Retractor that provides superior intraoral access. The unique buccal extensions retract powerful buccinator muscles for maximum access. Made of high quality medical grade materials that withstand repeated sterilization.

- Maximum patient comfort
- Easy tension control
- Boosts visibility to intraoral work areas
- Made in the USA

Item #: 601-190
1x cheek retractor
1 per pack

Bonding

Extraoral Cheek Retractors

- Full view for bonding of anterior and posterior teeth
- Does not reflect light from flash
- Cold sterilizable
- Made in the USA

Pedo ORT-300-021
Teen ORT-300-022
Adult ORT-300-020
2 per pack

Great for Adults and Children During Bonding

Lip Ring Retractor

 **Helps Protect Lips During Interproximal Stripping**

- Sized for adults and children
- Made of a high quality medical grade plastic
- Works great for bonding and intraoral photography
- Cold sterilizable

Item #: 54683
2 per pack

Nola Dry Field System

Achieve Total Bonding Success...

MADE IN THE USA

- Full Arch Access for Bonding
- Adjustable to Arch Length
- Maximum Patient Comfort
- Excellent Soft Tissue Retraction
- Fully Autoclavable to 280°F/135°C
- Reduces Bond Failure
- Prevents Treatment Delays

The Nola Dry Field System completely eliminates saliva and fully exposes both arches making it ideal for all bonding applications.

The system is easy to assemble, be inserted, and used by a single operator. The entire system is completely autoclavable making clean-up easy.

Dry Field Systems

Small (Red)	300-400
Large (White)	300-401

System Includes: 1x cheek retractor, 1x flexible connector, 1x tongue guard, 2x bilateral suction tubes, 1x central suction "Y" connector with low-volume adapter

Dry Field System Separate Components

<p>A Cheek Retractor <i>Assembly with flexible connector</i> Small (Red) 300-414 Large (White) 300-406 <i>1 per pack</i></p>	<p>Adjustable Cheek Retractor Keeps the cheeks back and fully exposes both dental arches</p>
<p>B Tongue Guards Small (Red) 300-413 Large (Translucent) ... 300-403 <i>2 per pack</i></p>	<p>Tongue Guard Holds the tongue in place and allows the patient to continue swallowing</p>

Forehead Rest with Ergonomic Dual Free-Flow Air Vents

Vertical Main Frame

Metal Reinforced Horizontal Crossbar

Durable Screws Throughout

Chin Cup with Ergonomic Streamlined Design, Free-Flow Air Vents and Full Range of Motion Option

Small Light-Weight End Caps

Multi-Adjustable Facemask®

Discover The Ideal Choice to Achieve Maximum Class III Compliance

- Free-flow air vents
- Full range of motion option
- Maximum patient comfort
- Fully adjustable
- Light-weight
- Screws designed for increased durability

MADE IN THE USA

Exclusive Patient Comfort Design

Quick and Easy Fit

1. Position bend in vertical bar over nose
2. Center forehead rest on forehead and lock in position
3. Center chin cup on chin and lock in position
4. Place crossbar approximately 2.0 mm below the upper lip and lock in position

KEY FEATURES

Free-Flow Air Vent
Forehead rest design features dual air vents for maximum comfort and air circulation.

Free-Flow Air Vent
Chin cup design features air vents for maximum comfort and air circulation.

Motion Option
Sliding design allows for a dynamic range of motion without side-to-side rotation.

Multi-Adjustable Facemask
Includes: 1x facemask, 1x hexagon key, and 2 sets of adhesive chin and forehead pads

IMPRESSION TRAYS

Not Your Ordinary Impression Tray!

**Superior Alginate
Retention with
No Adhesive
Spray Needed!**

No Adhesive Needed

Using DuraLock PLUS trays save time. By eliminating the extra steps of coating the tray with adhesive and waiting for it to dry, the impression process is simplified and accelerated.

Largest Variety of Tray Sizes

DuraLock PLUS trays eliminate inadequate coverage and/or tissue impingement and ensure an accurate fit every time by offering more size choices than competing trays.

Stability and Durability

The reliable strength and stability of DuraLock PLUS trays eliminate impression distortion and/or impression materials pulling away from the tray sides.

Clear Advantage™ Series I Clear Retainer Material

Thermal Forming Splint/Copolyester

Clear Advantage Series I is brilliantly clear and offers excellent conformity to the model for an exact fit. The material is durable and bonds with acrylic for creating modified appliances. Forms clear for a true "invisible" retainer. Sheets are sealed with a protective peel away film on both sides.

.020" (0.5 mm) 7500-100
.030" (0.7 mm) 7500-105
.040" (1.0 mm) 7500-110
5" x 5", 50 sheets per pack

.060" (1.5 mm) 7500-035
.080" (2.0 mm) 7500-040
5" x 5", 25 sheets per pack

- Invisible retainers
- Clear aligners
- Splints and bite planes
- Whitening trays
- Temporary bridges with pontics
- Non-Latex*
- BPA free
- Made in the USA

Clear Advantage Series I is a Moisture-Sensitive Product - Vacuum sealed to maintain product integrity.

Clear Advantage™ Series II Durable Retainer Material

Thermal Forming Coping/Polypropylene

Clear Advantage Series II is our most durable material and it will not shrink, crack or break. This material is slightly opaque in its transparency and offers excellent formability, flexibility and long term wear characteristics. The increased strength of this material is ideal for making retainers for bruxism patients. Not bondable with acrylic.

.020" (0.5 mm) 7500-115
.030" (0.7 mm) 7500-120
.040" (1.0 mm) 7500-125
5" x 5", 50 sheets per pack

- Extended life invisible retainers
- Clear aligners
- Splints and bite planes
- Temporary bridges with pontics
- Indirect bonding trays
- Non-Latex*
- BPA free
- Made in the USA

Sports Advantage™ Mouthguard Material

Thermal Forming Soft EVA

Our Sports Advantage material is a specially formulated EVA plastic that is soft and flexible. This material heats easily and conforms perfectly to the model. Custom fit mouthguards allow for excellent oxygen intake and a perfect fit for increased compliance.

Help Prevent Anterior Teeth From Flaring!

**TruForce™
Stainless Steel
Flat Bow Preformed
Retainer Wire**

- Greater stability and axial control of anteriors
- Allows for detailed contouring of wire to the labial surfaces
- Maximum tooth control not available with round wire
- Improves retainer aesthetics
- Made in the USA

TruForce Flat Bows from Ortho Technology are a single retainer wire with two distinct shapes, rectangular over the anterior teeth and round in the posterior segments. The flat rectangular segment helps prevent anterior teeth from flaring and prevents the labial bow from sliding toward the gingiva, while the round posterior wire anchors the appliance. The pre-formed cuspid loops come in eight sizes and are a great time saver for the lab.

ExpaBent Rapida Palatal Expander

Featuring Pre-Bent Arms

Produced entirely of biomechanical stainless steel. Arms are bent with anatomical angulation. Expansion capacity and direction arrow are laser engraved on the expander body.

- Medical grade stainless steel
- Laser engraved numbering

9.0 mm..... 019-2000-9
11.0 mm..... 019-2000-11
13.0 mm..... 019-2000-13

Package Includes: 1x expander,
1x swivel endoral key & activation key

Exspider Symmetrical Expander

A posterior articulation joint features expansion arms oriented onwards to get an arc of a circle basal expansion. The use of such expander is indicated when anterior transversal deficiencies on the maxillary arch occur, while the posterior diameter is correct.

- Delivers symmetric forces
- Laser engraved numbering
- Laser welded arms

9.0 mm..... A019-2001
Package Includes: 1x expander,
1x swivel endoral key & activation key
Body: 3/4" x 5/16", arm: 1/8"

Super Lingual Half-Screw Expander

The Half-Screw may be fabricated on the lingual surface of either the maxillary or mandibular arch for expansion and distalization. The overall width has been reduced resulting in an improved fit, allowing for a more comfortable appliance in the patient's mouth.

- The perfect solution for fixed mandibular expansion
- Use for individual quadrant expansion or molar distalization
- Compact fit for comfortable lingual expansion

Item #: A0623-08
Package Includes: 1x expander,
1x swivel endoral key & activation key
Arm: 2 1/16" (68.0mm)

TruEase™ Rapid Palatal Expanders

- **Safe** - Anti-unscrewing system with “click” upon turn indication.
- **Easy to Use** - Laser marked graduate scale for easier view of opening. Wide chamfer for easy patient insertion of opening tool.
- **Stable** - Two telescopic components of body always overlap for maximum stability and torsional rigidity. High resistance to breakage.
- **Compact Design** - Increased patient comfort.
- **Hygiene** - Housing designed with no blind areas for optimal oral hygiene.

“This new TruEase RPE gives you a definitive click (both by sound and by feel) when the turn is completed. No need to look for the next hole, no concerns about the screw backing up slightly when the key is removed, etc. Just listen for and/or feel the click. It’s pretty foolproof.”
 - **Dr. Perret, Orthodontist**

 10 per pack

Tongue Tamers® PLUS

Tongue Tamers PLUS can be used as a tongue trainer to help prevent anterior-lateral tongue positioning and as a button with intraoral elastics for simultaneous crossbite correction. Anterior box elastics can be used for simultaneous rapid open bite closure of severe skeletal anterior and lateral open bites.

System for Rapid Open Bite Closure

1. A 9-year-old patient demonstrating that the anterior tongue positioning is additionally directed inferiorly resulting in the proclination of the lower incisors, supporting the indication that Tongue Tamers PLUS need to be placed in both the upper and lower arches.

2. The recommended positions of the Tongue Tamers PLUS are mildly more gingival for the upper incisors.

3. Lip harmony and balance were shown after ROC using the four component system of Tongue Tamers PLUS, anterior box elastics, Sensation M Active Self-Ligating Brackets, and specialized archwires for torque control.

Nine rounded reminder protrusions help prevent tongue thrusting (does not cut tongue, operator's glove or skin)

Six undercuts for crossbite elastics in lateral open bite treatment that commonly require maxillary expansion

Mini tongue inhibitor button for good oral hygiene (alternative to Tongue crib) assisted by active self-ligating

80 Gauge mesh bonding pad for increased shear bond strength

Item #: 035-002

New and Improved!

Tongue Tamers®

Helps to Break the Habit!

- Eliminates detrimental forces
- Discourages over-active muscle activity
- Bonds to upper or lower arches
- High quality 17-4 stainless steel
- Curved base perfect for lingual placement
- Micro-etched 80-gauge mesh bonding base with adhesive well

Item #: 034-001
10 per pack

Great Retainer Wire Options

Fixed Appliances

Braided Retainer Wire

Perfect for Permanent Fixed Lingual Retainers Does Not Unwind When Cut

Used to make permanent fixed lingual retainers following orthodontic treatment, the Braided Retainer Wire features a very thin, rectangular wire that can be adapted with no occlusal interference while ensuring patient comfort. It prevents inadvertent tooth movement associated with active force wires. This three strand, stainless steel, braided retainer wire is annealed or "dead soft" so that it can be easily formed and holds bends to make bondable lingual retainers.

Can be used as semi-permanent orthodontic splinting of the upper or lower incisors and to maintain difficult extraction sites.

- Made in the USA

Item #: 68292
 .010" depth x .028" width x 6.0" lengths, 10 per pack

Flat Titanium Dead-Soft Lingual Wire

Offers easy formability, and ideal for retaining final torque positions

Used for fixed lingual retainers, this wire features increased interproximal strength for semi-permanent splinting and maintaining difficult extraction sites on upper or lower arches. Titanium wire offers reduced wear rates and is nickel-free, eliminating potential patient allergy issues. The "dead-soft" wire can be easily formed, and its flat dimensions are ideal for retaining final torque positions.

- Made in the USA

Item #: 68293
 .010" depth x .028" width x 6.0" lengths, 10 per pack

Bondable Lingual Retainers

Reliance® Ortho FlexTech® Flexible Lingual Retainer

A New Generation in Fixed Retention

- Secure and stable long term passive retention
- Patented interlocking chain design
- Adapts to lingual anatomy – No bending or burnishing
- No models or impressions
- Flexes interproximally – Resists breakage and bond failures
- No reciprocal forces – allows for minor biological movement – will not take an active bend
- Stainless steel offers increased tensile and torsional strength
- Low profile – patient comfort

ORTHO TECHNOLOGY

Interproximal Reduction

Interproximal Diamond Burs

It is recommended to begin with the medium diamond to quickly remove the required amount of enamel. Follow up with the fine diamond to smooth the tooth surface creating a precise, parallel end result.

- Consistent grit size and friction grip
- Excellent diamond particle exposure
- For use with high speed handpieces

High Speed Interproximal Kit

Item #: HS-IPR-KIT
Includes: 2x medium grit long, 2x fine grit long, 2x medium grit short, 2x fine grit short, 2x fine grit mosquito, and bur block

Dry heat sterilizable up to 340°F/170°C or autoclavable up to 250°F/121°C

Interproximal Diamond Strips

Perforated, Flexible

Perforated Diamond Strips are designed for complete control during interproximal stripping, shaping, and contouring. Strips allow easy access and precise manual enamel reduction resulting in a smooth, natural finish. Perforated design provides improved visibility, total control, and more flexibility than solid lightning strips. Strips are color coded; yellow for extra fine, red for fine, and blue for medium.

- Single sided and color coded
- Stainless steel with diamond coating
- Uncoated center gateway segment
- 2 widths: 2.5 mm and 3.75 mm
- 3 grits: extra fine (15 micron) fine (30 micron) medium (45 micron)
- Thickness: extra fine (.08 mm) fine (0.10 mm) medium (0.12 mm)
- Length: 147.0 mm

Lab Burs
 ▪ Holds 14 burs
 Item #: BB-100
 1 per pack

High Speed Burs
 ▪ Holds 27 burs
 Item #: BB-200
 1 per pack

Dry heat sterilizable up to 340°F/170°C or autoclavable up to 250°F/121°C

MiniStripper™

Compact Interproximal Stripping System

Safety & Control

at Your Fingertips

Designed by an Orthodontist

- Small size provides control and stability in tight spaces
- Compact size is safer to use than other interproximal stripping devices
- Variety of strip sizes for every interproximal stripping need
- Easy to use – different strips can be switched out in seconds
- Strips are available as single-sided or double-sided providing precise stripping of intra-arch space
- All kit components are autoclavable up to 275°F/135°C
- Stainless steel construction

QWIKSTRIP™

Making IPR Procedures Easier and Safer to Perform

QwikStrips are one of the industry leading interproximal solutions for removing cement from in between teeth and also for creating the precise spacing needed for minor tooth movement (IPR).

- Unique Grip
- Single Handed Use
- Better Tactile Control
- Depth Limiting Design
- Greater Safety for Both the Patient and the Doctor
- Single-Sided, Double-Sided, Curved and Serrated

Fully Autoclavable Kits!

In order to create precise interproximal spaces for any orthodontic procedure including invisible aligner treatment or any minor tooth movement needed, use QwikStrip™ color coded abrasive strips according to the sequence outlined. The reduction process (IPR) should begin with the white serrated strip (not pictured) to break the contact, followed by the yellow single-sided strip (.07 mm), and continue in sequence until the desired space is achieved. Check the reduction with an approved measurement guide before moving to the next strip (grit) in the sequence.

Note: Use all versions of QwikStrips (single-sided, double-sided, and curved) in any area of the mouth. In order to achieve optimal results and for maintaining the proper anatomical contour for posterior teeth, finish any IPR procedure by using the curved QwikStrips.

INTRODUCTORY KITS!

PLAQUEHD[®]

1st Professional
Plaque-Identifying Toothpaste

TARGETOL TECHNOLOGY contains disclosing agents to color and identify plaque build-up on teeth. This allows the patient to target any areas of plaque build-up that may have been missed during brushing to completely remove plaque from teeth.

STEP-BY-STEP INSTRUCTIONS

1. Place a pea-sized amount of toothpaste on your toothbrush.
2. Brush normally.
3. Spit out extra toothpaste but do not rinse.
4. Look in mirror and identify green plaque build up.
5. Without adding more toothpaste, brush away green spots.
6. Once all plaque is removed, rinse out mouth completely with water.

Retainer Retrievers

Directions for Use

1. Grasp the Retainer Retriever by the end with the hole in it.
2. Insert the hooked end of the Retainer Retriever into the mouth.
3. Using the hook, gently grasp an edge of the retainer or aligner near the front of the mouth and pull away from the arch.
4. If resistance is felt, it may be necessary to repeat step 3 in several locations along the arch. Do not use excessive force to try and remove the retainer or aligner.

- Helps patients remove appliances cleanly and efficiently

Retract EEZ[®] Photo Lip Retractor

Innovative Design

Provides Maximum Exposure

- Features easy grip handles
- Great anatomical fit
- One size fits most
- Excellent for occlusal photographs
- Angled bend helps retract lips
- Smooth rounded edge for patient comfort
- Made in the USA

Item #: 84516 (Clear)

1 per pack

Autoclavable up to 290°F/143°C

Cold Sterilizable

Heat sterilization may cause hazing

Not recommended for Dentronix

PixSure Perfect[®]

Stainless Steel Double Ended Photo Cheek Retractors

Two Sizes in One for a Sure Fit and Full Unobstructed View

- Double ended with a large retractor on one side and a small retractor on the other
- High quality stainless steel will not discolor, yellow or become brittle like plastic
- Brushed stainless steel construction
- Accepts any method of sterilization
- Ultra-slim design for maximum comfort

Item #: DT-159

Sterilizable up to 320°F/160°C

1 pair per pack

*Multi Use Cutter Item #: 400-106 **For full warranty and instructions for care information visit www.orthotechnology.com/x7

Distal End Cutter Item #: 400-100

Designed to cut all types of wires up to .021" x .025" (.53 mm x .64 mm). The head safely holds the cut portion of wire to be discarded.

Distal End Cutter with Long Handle Item #: 400-101

Extra long handles designed for additional user comfort. Cuts all types of wires up to .021" x .025" (.53 mm x .64 mm) and safely holds the cut portion to be discarded.

Flush Cut Distal End Cutter Item #: 400-103

Designed to cut and hold archwire distally flush to the buccal tube or bracket while reducing debondings. It is designed for all types of wire up to a maximum of .019" x .025" (.48 mm x .64 mm). This cutter comes with 1 silicone insert already loaded in the working end and two extras included in the package. Replacement silicone inserts can be re-ordered as needed.

Micro Cutter Item #: 400-099

The tapered tips are designed to cut soft wire pins and ligature wires up to .012" (.30 mm). The slim, short curved tips allow for access into difficult areas with 15° offset tips. Cutting edge length 0.39" (9.87 mm).

Micro Mini Pin & Ligature Cutter, 15° Angled Item #: 400-108

Designed to cut soft wire pins and ligature wires up to .012" (.30 mm). The 15° offset tip with ultra slim profile is a plus in the most difficult to access areas. Cutting edge length 0.54" (13.72 mm).

Micro Mini Pin & Ligature Cutter Item #: 400-104

Designed to cut soft wire pins and ligature wires up to .012" (.30 mm). The ultra slim profile, pointed and tapered tips allow access in the most difficult areas. Cutting edge length 0.50" (12.67 mm).

Multi-Use Cutter Item #: 400-106

Designed to cut soft wire pins and ligature wires up to .015" (.38 mm). Cutting edge length 0.50" (12.67 mm).

Mini Pin & Ligature Cutter Item #: 400-105

Designed to cut soft wire pins and ligature wires up to .012" (.30 mm). The slim profile is a plus in difficult to access areas. Cutting edge length 0.50" (12.67 mm).

Hard Wire Cutter Item #: 400-107

Designed to cut hard wires up to .021" x .025" (.53 mm x .64 mm). Cutting edge length 0.46" (11.70 mm).

Long Tapered Bird Beak Plier Item #: 400-109

Designed to bend a variety of smooth loops up to .021" x .025" (.53 mm x .64 mm).

Bird Beak Plier with Cutter Item #: 400-111

Designed for smooth bending surfaces for a range of loop sizes while providing a sharp blade for cutting. Cuts up to .021" x .025" (.53 mm x .64 mm).

Bird Beak Plier Item #: 400-110

Designed for smooth wire bending for a range of loops sizes for round wires up to .030" (.76 mm).

Light Wire Bird Beak with Groove Plier Item #: 400-130

Designed with a longer cone than a standard bird beak and is useful for forming precise loops in light wires up to .020" (.51 mm). The groove allows for locating and duplicating loops.

Light Wire Bird Beak Plier Item #: 400-136

Designed with a longer cone than a standard bird beak and is useful for forming precise loops in light wires up to .020" (.51 mm).

Small Weingart Plier Item #: 400-114

Designed with slim, tapered 20° tips with serrations that offer greater access and versatility for a secure grip of archwires and auxiliaries.

Standard How Utility Plier Item #: 400-115

Designed with serrated tips to provide useful placement and removal of archwires, pins and other auxiliaries.

Rectangular Arch Forming Plier Item #: 400-116

Designed for placing first, second, and third order bends up to .070" (1.78 mm) blade width and on wires up to .021" x .025" (.53 mm x .64 mm).

Lingual Arch Forming Plier Item #: 400-132

Designed to create double back and triple back bends in .030" (.76 mm) and .036" (.91 mm) lingual arch wires, up to .036" (.91 mm).

Posterior Band Removing Plier, Long Handle Item #: 400-120

Designed for clinician comfort. The alignment of the tip and occlusal pad is well suited for posterior band removal. These pliers come with a 3/16" (4.76 mm) pad already loaded in the working end and an extra 1/4" (6.35 mm) pad for trial purposes. Replacement pads can be re-ordered as needed.

Angulated Debonding Plier Item #: 400-122

Designed with a long handle for added user comfort and high angle design for effective anterior and posterior removal of all bracket style types – stainless steel, ceramic, and plastic brackets.

Debonding Plier Item #: 400-123

Designed for effective anterior and posterior removal of all bracket types – stainless steel, ceramic, and plastic brackets.

Adhesive Removing Plier Item #: 400-124

Designed with a reversible, replaceable blade that is used to remove the bulk of composite material after debonding brackets and attachments. These pliers come with a 3/16" (4.76 mm) pad already loaded in the working end and an extra 1/4" (6.35 mm) pad for trial purposes. Replacement pads can be re-ordered as needed.

Three Jaw Plier Item #: 400-117

Designed for contouring and bending wires up to .030" (.76 mm).

NiTi Three Jaw Plier
Item #: 400-135

Designed for the forming and contouring of all archwires, especially for nickel titanium wires up to .020" (.51 mm).

Stop (V-Bend) Plier
Item #: 400-134

Places a V-Bend in archwires, including nickel titanium, to prevent the archwire from traveling. Wires up to .021" x .025" (.53 mm x .64 mm).

NiTi Distal Cinch Back Plier
Item #: 400-127

Designed as a multi-use bender for bending NiTi wire up to .025" (.64 mm). Tie-back NiTi with no heat.

Tweed Loop Forming Plier
Item #: 400-131

Designed to form loops with .045" (1.14 mm), .060" (1.52 mm), and .075" (1.91 mm) diameters for creating bull and helical loops on wires up to .021" x .025" (.53 mm x .64 mm).

Jaraback Plier
Item #: 400-129

Designed to be a versatile light wire bending plier with grooves that assist with precise bending and closing of loops. The serrated surface grips wires up to .020" (.51 mm).

Replacement Teflon™ Tips
Item #: 400-124T

1/4" (6.35 mm) Teflon replacement tips for Adhesive Removing Plier (Item #: 400-124).
6 per pack

Replacement Blades
Item #: 400-124TT

5.0 mm replacement blade for Adhesive Removing Plier (Item #: 400-124).
1 per pack

Crown Band Contouring Plier
Item #: 400-128

Designed for reshaping and contouring steel molar bands for a customized fit.

Replacement Teflon™ Tips
Item #: 400-120T

3/16" (4.76 mm) Teflon replacement tips for Posterior Band Removing Plier (Item #: 400-120).
6 per pack

Hollow Chop Contouring Plier
Item #: 400-133

Perfect for subtle contouring of arch wires up to .030" (.76 mm).

Replacement Teflon™ Tips
Item #: 400-120TT

1/4" (6.35 mm) Teflon replacement tips for Posterior Band Removing Plier (Item #: 400-120).
6 per pack

Replacement Silicone Inserts
Item #: 400-103T

Silicone replacement inserts for Flush Cut Distal End Cutter (Item #: 400-103).
3 per pack

New and Improved!

Falcon Orthodontic Instruments®

Item #: 800-105

Performance, Usability, and Guaranteed Reliability

Our new Falcon Orthodontic Instruments have been designed and manufactured with an attention to detail that will assure enhanced performance and longevity. The care and precision that goes into each and every instrument will ensure a quality you can rely on every time you pick one up!

- Superior performance stainless steel inserts
- Smooth and contoured edges
- Reliable flush screw joint
- Polished corrosion-resistant finish
- Lifetime warranty against material defects and craftsmanship

Hard Wire Cutter, 15° Angled Item #: 800-103

Designed to cut hard wires ranging from .010" (.25 mm) to .022" x .028" (.56 mm x .71 mm).

Multi-Use Cutter Item #: 800-105

Designed to cut soft-wire pins and ligature wire up to .015" (.38 mm).

Micro Mini Pin & Ligature Cutter Item #: 800-107

The fine tips on this model allow access into hard-to-reach areas. Designed to cut soft-wire pins, elastics, and ligature wire up to .012" (.30 mm).

Falcon
Orthodontic Instruments®

Micro Mini Pin & Ligature Cutter w/Long Handle
Item #: 800-107XL

Long handled option that allows even easier access into those hard-to-reach areas. Also designed to cut soft wires up to .012" (.30 mm).

Micro Mini Pin & Ligature Cutter, 15° Angled
Item #: 800-109

15° offset with fine tips allow access into hard-to-reach areas. Designed to cut soft-wire pins, elastics, and ligature wire up to .012" (.30 mm).

Micro Cutter
Item #: 800-110

The extra fine tips allow access to tight inter-bracket areas. Designed to cut soft-wire pins, elastics, and ligature wire up to .012" (.30 mm).

Distal End Cutter (Safety Hold)
Item #: 800-101

Can easily cut all types of wires ranging from .012" (.30 mm) to .021" x .025" (.53 mm x .64 mm).

Distal End Cutter (Safety Hold) w/Long Handle
Item #: 800-101XL

Long handle option that can easily cut all types of wires ranging from .012" (.30 mm) to .021" x .025" (.53 mm x .64 mm).

Small Distal End Cutter (Safety Hold) w/Long Handle
Item #: 800-338

Compact tips for easier access. Safety hold is ideal for cutting wires within the patient's mouth. Pliers shear-cut hard wires close to the buccal tube and hold loose wire. Maximum cutting capacity: archwires up to .019" x .025" (.48 mm x .64 mm).

Distal End Cutter Safety Hold & Flush Cut
Item #: 800-111

The safety hold cutter cuts flush distal to the buccal tube. Cuts all types of wires from .010" (.25 mm) up to .020" (.51 mm).

Replacement Pads.....801-011
3 per pack

Slim Weingart Pliers
Item #: 800-202

Serrated tips hold wires firmly in the mouth. Tapered beaks fit easily into hard-to-reach areas.

How Pliers
Item #: 800-203

Serrated tips are designed for superior wire gripping. How Pliers are useful for placement and removal of archwires pins, and other auxiliaries.

Utility Arch Pliers
Item #: 800-334

Special design with 3 mm step for accurate utility arch construction. The notches in pliers' beak crimp preformed utility archwires into proper position.

Falcon

Orthodontic Instruments®

Angled Utility Arch Pliers Item #: 800-335

Angled beak with pin simplifies the placement and manipulation of preformed utility archwires. Forms 3 mm steps for accurate utility arch construction.

Preformed utility archwires can be easily crimped in the mouth.

Crown & Band Contouring Pliers Item #: 800-221

Ideal for reshaping molar bands and crowns.

Hook Crimping Pliers, Straight Item #: 800-332

Designed for placement and securing of crimpable archwire hooks and power hooks. Straight beak allows for direct placement of hook on archwire.

Hook Crimping Pliers, Angled Item #: 800-333

Designed for placement and securing of crimpable archwire hooks and power hooks. Angled beak allows for precise placement of hook on archwire.

Adhesive Removing Pliers Item #: 800-206

Superior tip design allows easy access to remove excess adhesive after debonding. Double ended replaceable blade.

Replacement Blade.....801-206B
1 per pack
¼" Replacement Pads801-206T
6 per pack

Posterior Band Removing Pliers, Long Item #: 800-207

Quickly removes posterior bands. The pointed tip slides under the band while the plastic tip protects the occlusal surface of the tooth for easy band removal and patient comfort.

⅜" Replacement Pads801-207T
6 per pack
¼" Replacement Pads 801-207TT
6 per pack

Direct Bond Bracket Removing Pliers Item #: 800-213

Easily removes steel, ceramic, and plastic direct bond brackets and remaining adhesive from the tooth surface.

Replacement Blade.....801-213B
1 per pack

Debonding Pliers Item #: 800-219

Easily removes steel, ceramic, and plastic direct bond brackets and remaining adhesive from the tooth surface.

Angulated Debonding Pliers Item #: 800-220XL

The angulated design quickly and easily removes anterior and posterior direct bond brackets.

Jarabak Pliers Item #: 800-301

Excellent for precise wire bending and forming of loops. The fine serrations on the square beak and three precision grooves permit accurate and intricate bends and loops. Wires up to .020" (.51 mm).

Three Jaw Pliers
Item #: 800-302

Adjust clasps, retainers, and archwires without marring the wire. The precision tips are carefully beveled to create extreme accuracy in adjustments. Wires up to .030" (.76 mm).

Tweed Loop Forming Pliers
Item #: 800-306

Excellent for making precise loops in .045" (1.1 mm), .060" (1.5 mm), and .075" (1.9 mm) diameters in wires up to .022" x .025" (.53 mm x .64 mm).

Bird Beak Pliers
Item #: 800-304

An instrument for all types of wire bending. The round and pyramid-shaped tapered beaks will work with any size wire up to .030" (.76 mm).

Arch Bending Pliers
Item #: 800-307

Easily torque and bend wires without nicking the archwire. .070" (1.8 mm) blade width. Wires up to .022" x .025" (.53 mm x .64 mm).

Bird Beak Pliers w/Cutter
Item #: 800-325

A versatile instrument that bends and cuts wire ranging from .015" (.38 mm) to .025" (.64 mm).

Lingual Arch Forming Pliers
Item #: 800-309

Forms double-back and triple-back bends in .030" (.76 mm) and .036" (.91 mm) wire for lingual sheaths.

Light Wire Bird Beak Pliers
Item #: 800-318

Precision tapered beaks allow intricate bends and loops in archwires up to .020" (.51 mm).

Hollow Chop Contouring Pliers
Item #: 800-310

Smooth working surfaces allow for consistent forming and contouring of arches up to .030" (.76 mm).

Light Wire Bird Beak Pliers w/Groove
Item #: 800-305

Precision-tapered beaks allow intricate bends and loops in archwires up to .020" (.51 mm). The groove ensures a no-slip grip.

Mini Three Jaw Pliers
Item #: 800-312

Precision tips for accurate wire and clasp adjusting and contouring. Also excellent pliers for bonding. Superior strength for wires up to .030" (.76 mm).

Falcon

Orthodontic Instruments®

Nance Loop Forming Pliers Item #: 800-319

Precision loop forming with four step tip (3, 4, 5, and 6 mm). Excellent for wires up to .022" (.53 mm). Non-serated tips and beveled edges prevent wire scoring.

Loop Tie Back Pliers Item #: 800-328

Four-step pliers automatically form loops on wire up to .020" (.51 mm) with one motion. Closing loops are easily made to desired height.

Adams Pliers Item #: 800-320

Tapered square beaks; .045" (1.1 mm) at tip and parallel at 1 mm opening, ideal for placing all types of attachments or bending wire up to .40" (1.0 mm).

Stop (V-Bend) Pliers Item #: 800-321

Place an accurate 1 mm V-bend with one simple squeeze to shorten archwire or provide a positive stop. Wires up to .022" x .025" (.53 mm x .64 mm).

Optical Pliers Item #: 800-323

Round and concave beaks bend round or rectangular wire with a firm grip that will not score wire. Easily bends and forms all types of wire up to .022" x .025" (.53 mm x .64 mm).

Torquing Pliers Set w/Key Item #: 800-337

Specifically designed to place torquing bend into the small sections of archwires (such as a bend for a single tooth) without distorting adjacent sections of the archwire. Two-piece set consists of one torquing plier and corresponding key.

3 mm Utility Pliers Item #: 800-336

Automatically form a 3 mm step in archwire. Excellent instrument for bending utility archwires.

Detailing Step Pliers .50 mm Item #: 800-329

Double-sided offset beak permits bayonet bends. Creates right-hand or left-hand step-up or step-down at .50 mm increments.

Detailing Step Pliers .75 mm Item #: 800-330

Double-sided offset beak permits bayonet bends. Creates right-hand or left-hand step-up or step-down at .75 mm increments.

Detailing Step Pliers 1 mm Item #: 800-331

Double-sided offset beak permits bayonet bends. Creates right-hand or left-hand step-up or step-down at 1 mm increments.

Falcon

Orthodontic Instruments®

Large-Diameter Feather-Light Handle

Advanced Ergonomic Design With Satin Finish

- **Large-Diameter Handle**
Reduces muscle fatigue for less risk of carpal tunnel syndrome
- **Feather-Light Design**
Allows for a relaxed grip which provides improved tactile sensitivity
- **Textured Grip**
Better gripping and rotational control
- **Corrosion Resistant**
Made with high quality stainless steel material

Falcon Hand Instruments
Heat sterilizable up to 370°F/188°C
1 per pack

Double-Ended Distal Bender

The universal standard size double-ended distal bender easily crimps the distal ends of all typical wire sizes. Designed to be quick and comfortable.

- Easy access in difficult areas
- Textured grip for total control
- Ideal for precise bending
- Stainless steel design
- .018" and .030" openings perfect for all wires
- Simple to use
- Made in the USA

Item #: OT-320
Heat sterilizable up to 370°F/188°C
1 per pack

Lotus Plus® SLB Explorer Double Ended Ligature Director and Explorer, Item #: OT-2106

For opening Lotus Plus bracket clip
▪ Features an archwire director end to engage the archwire into the bracket slot

See page 17 for Lotus Plus SLB opening instructions

Band Pusher and Schure Scaler, Item #: OT-2100

Explorer, Item #: OT-2105

Ligature Director, Item #: OT-2104

Direct Bond Adhesive Remover, Item #: OT-2102

Mathieu Hemostat High Polished Finish

For elastic modules or stainless steel ligature ties. Item #: OT-8015
Heat sterilizable up to 370°F/188°C
1 per pack

Mathieu Hemostat Narrow Tip, High Polished Finish

Narrow tip designed for easy placement of elastic modules. Item #: OT-8015N
Heat sterilizable up to 370°F/188°C
1 per pack

Mosquito Hemostat With Satin Finish

Tapered serrated tip for placement of elastic modules.

Item #: OT-027
Heat sterilizable up to 370°F/188°C
1 per pack

Curved Mosquito Hemostat With Satin Finish

Curved, tapered serrated tip for placement of elastic modules. Made in the USA

Item #: OT-028
Heat sterilizable up to 370°F/188°C
1 per pack

Serrated Trimming Scissors

- Serrated design for controlled trimming without slippage
 - Curved tip cuts easily and precisely, even in hard to reach lingual areas
 - Made in the USA
 - 3 1/2" curved serrated trimming scissors
- Item #: OT-180
Heat sterilizable up to 370°F/188°C
1 per pack

Lotus Plus® DS Turn Key Instrument

Item #: OT-2108
Autoclavable up to 250°F/121°C
1 per pack

Lotus Plus® Clip Opening and Closing Tweezer

Easy Opening
To open the Lotus Plus bracket clip, place the straight arm in the clip opening, and the curved arm in the under tie-wing area and squeeze. The tool will fully open the Lotus Plus bracket without the worry of accidental bracket conversion.

Secure Closure
To close the Lotus Plus bracket clip, place the straight arm at the base of the clip and the curved arm in the under tie-wing area and squeeze.

- Made in the USA

Item #: OT-210
Heat sterilizable up to 370°F/188°C
1 per pack

Lotus Plus® Archwire Directing and Clip Closing Tweezer PLUS! Easily Seats Archwires in Crowded Cases

Secure Closure
To close the Lotus Plus bracket clip while simultaneously directing the archwire, place the notched arm on the archwire and the other arm at the base of the clip and squeeze.

- Made in the USA

Item #: OT-211
Heat sterilizable up to 370°F/188°C
1 per pack

Lotus Plus® SLB Tweezer Clip Closing Tool

Secure Closure

To close the Lotus Plus bracket clip use the Lotus Plus SLB Tweezer. See page 17 for instructions.

Item #: OT-202

Heat sterilizable up to 370°F/188°C
1 per pack

Direct Bond Instrument

Stainless steel construction. Reverse action will not release bracket until desired. Designed with serrated tips.

Item #: OT-204

Heat sterilizable up to 370°F/188°C
1 per pack

Direct Bond Tweezers with Bracket Aligner

Reverse action will not release bracket until desired. Aligns brackets by placing the opposite end into the bracket's slot. Stainless steel construction.

Item #: OT-322

Heat sterilizable up to 370°F/188°C
1 per pack

Direct Bond Tweezers

Stainless steel construction. Reverse action, specifically designed for accurate posterior placement of brackets or tubes.

Item #: OT-203

Heat sterilizable up to 370°F/188°C
1 per pack

- Made in the USA

Eruption Appliance Angled Button Tweezers

Designed to fit snugly around button pad type. Special claw-type tweezers to grip the button securely until final placement.

- Made in the USA

Item #: OT-213

Heat sterilizable up to 370°F/188°C
1 per pack

Eruption Appliance Curved Eyelet Tweezers

Designed to fit low profile eyelets and mesh pad styles. Special grooves to grip flat low profile pads with gold loops that are commonly difficult to hold.

- Made in the USA

Item #: OT-212

Heat sterilizable up to 370°F/188°C
1 per pack

Keat Buccal Tube Tweezers

The curved body of the tweezers provides an unobstructed view for easier precise placement of buccal tubes.

A. Keat Buccal Tube Tweezers

Item #: OT-209

Heat sterilizable up to 370°F/188°C
1 per pack

B. Reverse Action Keat Buccal Tube Tweezers

Item #: OT-209R

Heat sterilizable up to 370°F/188°C
1 per pack

Separating Plier

With Satin Finish

Stainless steel with spring back action for easy use.

Item #: OT-101
Heat sterilizable up to 370°F/188°C
1 per pack

Boone Gauge Stainless Steel

Check the height of bracket placement from incisal edge. 3.5, 4.0, 4.5, and 5.0 mm.

Item #: OT-000-SS
Heat sterilizable up to 370°F/188°C
1 per pack

Mershon Band Pusher

- 5 sided angled serrated tip
- Reduced risk of slippage
- Lightweight hollow handle

Item #: OT-206
Heat sterilizable up to 370°F/188°C
1 per pack

Positive Positioner

Precise placement of direct bond tubes or attachments made simple with the spring-loaded mechanism and small, grooved tips. The Positive Positioner is made of lightweight, anodized aluminum.

- Access first and second molars easily
- Slides open smoothly to release tube
- Made in the USA

Item #: OT-2222
Autoclavable up to 250°F/121°C
1 per pack

Aluminum Height Gauge

Check the height of bracket placement from incisal edge. 3.5, 4.0, 4.5, and 5.0 mm.

.018" OT-2118-SS
.022" OT-2122-SS
Autoclavable up to 250°F/121°C
1 per pack

High Heat Height Gauge

Same features as the aluminum gauge at a fraction of the price.

Withstands heat up to 350°F/177°C.

.018" OT-2118-HH
.022" OT-2122-HH
1 per pack

High Heat Bite Stick

- Metal serrated triangle tip
- Molded high impact plastic
- Dry heat sterilizable
- Made in the USA

Item #: OT-600-199
Autoclavable up to 270°F/132°C
1 per pack

Sensation™ Self-Ligating Bracket System Opening Instruments

Closed

Open

Simple Opening

Sensation and Sensation M Clips open and close in the same manner, however, each requires a unique instrument. While both instruments may look similar, each must be used with the appropriate bracket system. Using the incorrect instrument may result in damaging the clip.

To open the Sensation or Sensation M Bracket Clip:

1. Place the inside hook of the opening instrument into the opening of the door of the bracket interface.
2. Tilt the opening instrument gingivally to avoid possible removal of the clip.
3. Pull straight down to open using a gentle controlled force.

Color Coded Bite Sticks

Molded high impact plastic with metal serrated triangle tip

- Made in the USA

Cold Sterilizable

Teal	600-201T

Shipping Information

Shipping: Most orders ship the same day you place your order. You can have your products as soon as the next business day. Place your order before 2:00 P.M. E.S.T. and request overnight shipping. Otherwise we will ship your order standard carrier service.

Hassle-Free Returns: Customer satisfaction is Ortho Technology's primary objective, and we understand, your purchase may not always meet your needs. In an effort to make the return process as hassle-free as possible, we ask that you please call us. Your satisfaction is very important to us, and your comments help us improve our products and service. When you call, a mandatory Return Merchandised Authorization (RMA) number will be assigned. This number will help expedite your exchange return.

Return Policy: Include the Return Merchandise Authorization (RMA) number which can be obtained by contacting our Customer Service Department. Products may be returned for credit within 30 days from Invoice date. Products under warranty must meet terms within warranty period. After 31 days and up to 60 days from Invoice date, return request will be evaluated by a Customer Service Representative as a courtesy to our customers. Returns may be authorized when these conditions are met: 1. Products are in original and unopened packaging and in re-sellable condition. 2. Returns must meet quality inspection standards, appearance and physical count. 3. Items returned after 45 days are subject to a 15% handling and restocking fee. Custom orders and special orders are not accepted for return.

Due to OSHA regulations regarding possible exposure to bloodborne pathogens, Ortho Technology is prohibited from accepting instruments for evaluation without proof of sterilization. Unless proof of sterilization is evident, Ortho Technology reserves the right to either destroy these items or return them to the customer.

Order Shortage Notification Policy: Any shortage of your order must be reported promptly within 30 calendar days of your order receipt to be considered. Ortho Technology is not responsible for any shortage reported after 30 calendar days.

Terms and Billing: Orders from qualified accounts are accepted on the basis of payment within 30 days from the date of invoice. All invoices are to be paid in U.S. Dollars. Prices listed are F.O.B. point of origin. A packing slip and invoice are enclosed with each shipment. A statement covering all open invoices is mailed monthly. A 1.5% (\$2.00 minimum) per month service charge on overdue balances will be added to accounts.

Canadian Customers: To provide expedited and economical shipping for our Canadian customers, orders will be shipped into Canada to your door by a common carrier. All duties, brokerage, GST, and other fees are applied during billing. This will ensure easy receipt of shipment. For easy payment, we recommend using a credit card. If payment by check is required, please write "In U.S. Funds" on the check. All catalog prices and invoice totals are listed in U.S. Dollars. All Duties and Taxes are the responsibility of the importer. Duties and Taxes will not be refunded on returns.

Continued Improvement: Due to continuing product improvements, Ortho Technology reserves the right to change prices, discontinue products or change the design of products without advance notice. We are not responsible for typographical or photographic errors, and we reserve the right to limit quantities.
